

VKC Series

VERTICAL SEALLESS PUMPS

VERTIMAG™ Pumps VKC5.5, 6, 6H, 7, 8, 10 1/3 to 1 1/2 HP (.25 to .55 kw)

VKC5.5, 6, 6H
7, 8 & 10

Pat. No. 5,708,313

VERTIMAG™ technology – a design breakthrough in vertical pumps!

Using rare-earth Neodymium magnets, VERTIMAG™ achieves a truly sealless, vertical pump design free of wetted shaft bearings. A completely sealed, air tight column and the absence of a secondary/back impeller prevent aeration (virtually eliminating micro-bubbles) and the release of fugitive environmental emissions.

VERTIMAG™ answers conventional vertical pump applications within a wide range of operating conditions. The patented VERTIMAG™ is a durable performer with low maintenance requirements.

Features

- Magnetic drive
- Non-aerating (no micro-bubbles)
- Reduced environmental emissions
- No wetted shaft bearings
- Mounts inside or outside of tank
- Polypropylene or PVDF construction
- Accepts standard NEMA or IEC motors
- Modular build: in 6" increments from 12" (30 cm) to 60" (152 cm)
- Up to 1.8 specific gravity
- Maximum temperature 140°F (60°C)
- Maximum working pressure: 60 psi

Performance

60 Hz 3450 rpm

50 Hz 2900 rpm
