

VKC SERIES

MODELS VKC5.5-10

The VKC Series

Using rare-earth Neodymium magnets, VKC Series pumps achieve a truly sealless, vertical pump design free of wetted shaft bearings. A completely sealed, air tight column and the absence of a secondary/back impeller prevent aeration (virtually eliminating micro-bubbles) and the release of fugitive environmental emissions.

The VKC Series answers conventional vertical pump applications within a wide range of operating conditions.

Features

- Magnetic drive
- Non-aerating (no micro-bubbles)
- Reduced environmental emissions
- No wetted shaft bearings
- Mounts inside or outside of tank
- Polypropylene or PVDF construction
- Accepts standard NEMA or IEC motors
- Modular build: in 6" increments from 12" (30 cm) to 60" (152 cm)
- Up to 1.8 specific gravity
- Maximum temperature 140°F (60°C)
- Maximum working pressure: 60 psi

Typical Applications

- Circulation through filters & eductors
- Bio-filtration & odor control
- Fume scrubbers
- Chemical sumps

60 Hz, 3450 rpm

50 Hz 2900 rpm

VKC SERIES
